T-727 Removing Solvent

【Instruction】

T-727 Removing Solvent is made for Vacuum Metallization to remove coatings from deflection then rework. Excellent performance on ability of coatings removing, not easy to hurt materials.

【Application】

Dipping deflection into T-727 Removing Solvent about 1-2 hours then wash materials by water. The materials can be reused after drying. Need to change T-727 Removing Solvent regularly to avoid peeling effect reducing because of long-term usage.

【Notices】

1. Please keep good air circulation in working place to avoid harming health due to long-term breathing in solvent. If chemicals splash into eye or on skin accidently, immediately flush contacting area by huge amount of water then send to medical treatment.
2. T-727 Removing Solvent must be stored in cool and dry indoor room under 40°C. The expired time is one year in unopened situation.
3. Please keep cap closing after opening and finish within one week to avoid affecting quality because of solvent evaporation.
